1. Introduction

1. 1. Overview

When we need to make a IP P2P call, or when we need to load the management website of the device to check or change settings, we need to know its IP address. This document introduces how to check i53W's IP address.

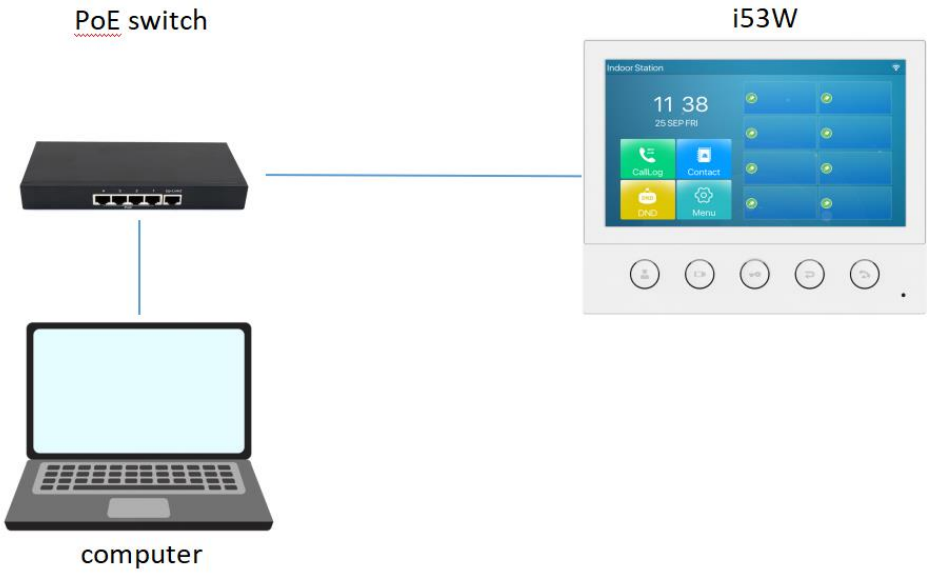
1. 2. Applicable Model

Fanvil i53W

1. 3. Before You Start

Step1.
Prepare PoE switch, network cable, i53W, computer.
Step2.
Refer to the connection diagram, connect i53W to the switch.
Step3.
Connect the computer to the same switch as i53W with Network cable.

1. 4. Connection Diagram



2. How to Check i53W's IP Address

There are two ways to check the IP address of i53W, via touch screen and via IP Scanner tool. Please check the following steps for detail.

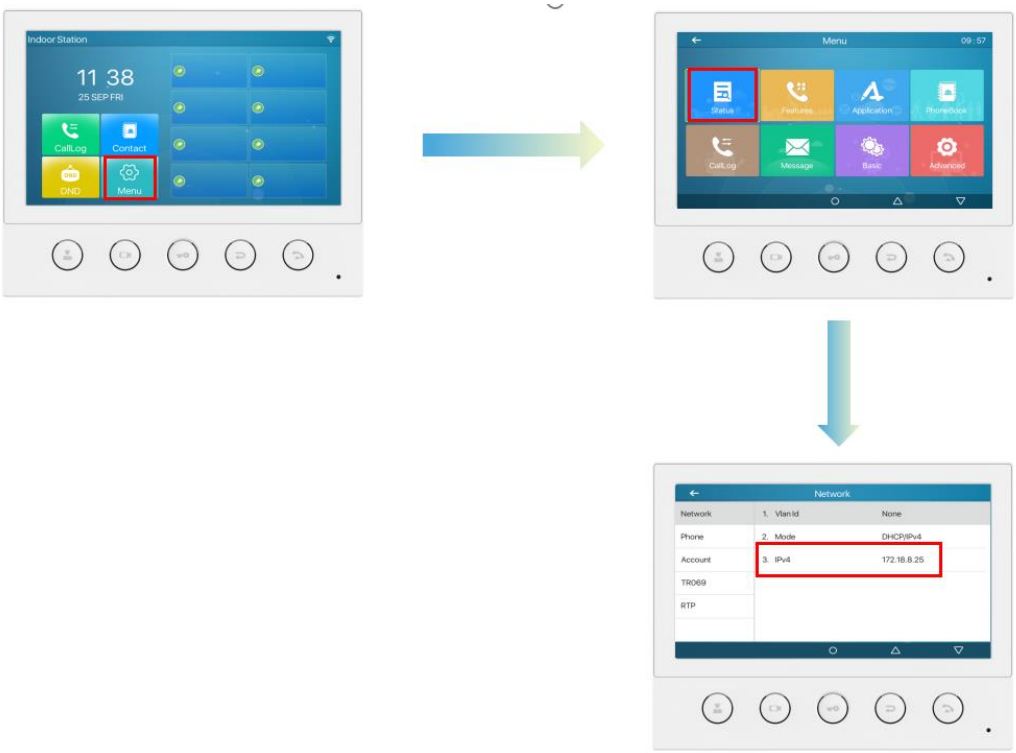
2. 1. Check IP Address of i53W via touch screen

Step1.

Refer to the above connection diagram, connect i53W to PoE switch.

Step2.

At the main user interface, click【Menu】>>【status】, and then you will see its IP address.



2. 2. Check IP Address of i53W via IPScanner tool

Step1.

Download IPScanner tool from Fanvil website:

https://www.fanvil.com.cn/Uploads/Marketing/Tool/IPScanner_v1.2.1.zip

Install this tool for your computer.

Step2.

Refer to the connection diagram, connect the computer and i53W to the same PoE switch with Network cable.

Step3.

Open IPScanner tool, find the record which has the same MAC address as your i53W machine, and you can find its IP address too.
